Dahlias

Scarce volume \$

Not enough production volume to guarantee availability&selected color.

TIPS ON SELECTING FLOWERS

Flowers are a big part of your wedding! Budget conscious brides try to make the best decision, without sacrificing the esthetics. Florists can accommodate such orders when there is enough lead time and when brides are flexible on flower choices.

When planning your wedding in the Riviera Maya, you can get these flowers year-round and at best prices: roses, lilies, gerbera daisies, gladiolus, lisianthus, iris, red and pink ginger, carnations, crysanthemums, green mums.

Also available and not too expensive, are calla lilies (Mexican Alcatraz),

hydrangeas (green). Some of these are scarce some months, so you need to check in advance with your florist.

For tulips, orchids, mini Calla lilies plan to spend more and give enough notice. Generally, Cymbidium orchids in white and green are a top choice. Debrobium orchids in white and purple are also a good choice.

Budget breakers: Peonies - very hard to get. Succulents - generally available. Phalaenopsis orchids. Stephanotis.
